

The Genetic Health Screen helps you better understand your health

What is the Genetic Health Screen?

This accurate, medical-grade DNA test identifies a predisposition to developing hereditary cancers of many types, certain cardiovascular diseases, and other conditions.

Who takes a Genetic Health Screen?

The Genetic Health Screen is for adults interested in knowing how their genetics may affect their health.

Why is the test helpful?

The Genetic Health Screen is a proactive way to screen for inherited diseases that, if found early, may help your doctor prevent or treat the disease.

How do I access the program?

- Once enrolled, log in to your account at member.genomiclife.com
- Follow the prompts to be guided to the best screenings
- When genetic screening kits arrive, follow the directions provided in the package
- Receive your results within 21 days
- Review your results with a board-certified Genetic Counselor
- Remember to share results with your Doctor

Common Questions

- **Is there additional cost?** No, the Genetic Health Screen and the Genetic Counselor visit are included in your Genomic Life membership.
- **What if I have or had cancer?** Call 844-MYGENOME to speak with a Oncology Navigator about the personalized cancer services included in your membership.
- **What if I feel healthy?** Great, the Genetic Health Screen is intended to help you stay that way!

1 in 6

Roughly **1 in 6** people carry a genetic change that increases their risk for diseases that have medical interventions available*
